

Benefits of Growing Trees

The strategic establishment of trees can:

- Solve salinity problems
- Improve productivity by providing shade and shelter
- Diversify farm income
- Provide wildlife habitat
- Improve the aesthetic living environment

Farm Forestry
Network Inc.

Vision

The establishment of an ecologically and economically sustainable industry based on farm and urban forest plantations which derive wealth from the sale of value added forest products to the domestic market.

BIFFN Inc. is a group of people interested in growing trees for farm forestry, supporting and co-operating with each other in the exchange of knowledge and skills in the development of tree growing.

BIFFN Inc. aims to pool resources and:

- develop a market for the 1.5 - 3 million trees and thinnings that will be generated
- provide members with the knowledge and skills about pruning, health, thinning, and nutrition and how to troubleshoot problems along the way
- promote tree growing for shelter and biodiversity as well as forestry
- business planning

Membership

Membership is open to anyone interested in farm forestry: landholders, processors and investors.

Members Benefits:

- BIFFN News quarterly
- Agroforestry News quarterly
- Monthly meetings
- Field visits bi-monthly
- Co-operate and share with people the ups and downs of growing trees

Membership fee \$40 per year per family

I/we wish to apply for BIFFN Inc membership. Please find enclosed my/our payment for \$40.00
